General Information

Using This Parts Price List Book

Should a part be used only with a certain type of fuel (L.P., NG, or kerosene) then that fuel type will be in the part description. Throughout this publication the abbreviation “HSI” stands for hot surface ignition, and “SI” stands for spark ignition.

Selection and Application of Parts

Interpretation of any owner’s manual and the application of any part shall be the responsibility of the purchaser. Customers requiring assistance in selection and identification of repair service parts should contact their nearest dealer, wholesaler, or the L.B. White Company, LLC for assistance.

When an L.B. White part number is listed in the parts price list, but retail price is not indicated, reference will be noted on the parts price list either to use another L.B. White part number or that the part has become obsolete. The literature referenced is normally an L.B. White Service Bulletin to explain the reason for change and to aid parts replacement.

Substitution

The L.B. White Company, LLC reserves the right to substitute parts of a similar design and/or parts of a similar material. Owners’ Manuals or the guides below should be used in conjunction with this price list. For further instruction on how to use any of the listed guides, please contact Customer Service at L.B. White Company, LLC
